

Health Current Summit and Trade Show

Creating Connections. Improving Lives.

An overview of the interoperability
landscape

Speakers

Melissa Kotrys

Chief Executive Officer

Morgan Honea

Executive Vice President

HIE Landscape

Contexture's view on the evolving HIE industry

- HIEs continue to support their communities, including expansion in new and needed areas
 - State Agency support/engagement
 - Community benefit organizations
 - Advanced directives
 - Correctional facility health
 - Claims integration
 - Payment reform support
- Interoperability will be shaped by upcoming federal regulations, further advancing data sharing and patient access

HIE Landscape

Contexture's view on the evolving HIE industry

- Evolution of HIEs will continue – health data utility models, regionalization and consolidation, etc.
 - More than 10 HIE mergers in the last 5 years
 - Growing trend of HIEs executing shared services agreements with other HIEs
- Public health infrastructure focus will be critical in coming years, as nation recovers from pandemic and prepares for the future

Contexture Merger

#BETTERTOGETHER

Why merge?

- The HIE landscape is changing
- Similar geographies and cultures
- Two large HIEs coming together means leveraging different skillsets, knowledge and processes; economies of scale and greater efficiencies
- Larger data set at a regional level supports more opportunities to improve population health
- Better positions us to compete at a national level and meet federal policy changes

In essence...we are #BetterTogether!
